Banner Battery Tester HD1+

Banner Heavy Duty Battery Tester incl. printer

The HD1+ is a battery tester in robust design. Ideal tool for measurements of motorcycle, car and truck batteries. Including 12V and 24V battery charging-/starting system test. Easy to use, high accuracy and fast printing characterize this tester. A software to record the measurements results on the PC is also included

NEW: Internal resistance value shown, temperature compensation, 4 color LCD, robust & heavy-duty clamp set

PERFORMANCE

Functions: measures voltage of 6 V and 12 V batteries incl. internal resistance in Ohm (mΩ), charging system test of 12 V and 24 V, temperature compensation

Battery technology - standard, Ca, start-stop (AGM, EFB), gel batteries), select new or used battery

Equipment: robust design, more robust clamps, graphic printer with date and test code, easy to handle

Technics: microprocessor-based measurement for accurate and instant results

Protection: reversed polarity and overvoltage protection

Display: big colored 4-line display, SOC and SOH is shown

Features: print last result, **New:** backward function

Norm systems: SAE, EN, IEC, DIN and JIS

APPLICATION

Professional workshop

6 & 12 V battery-, 12 & 24 V charging system test
(standard, Ca, start-stop (AGM, EFB), gel)

TECHNICAL DATA

Type:	BBT HD1+
Test voltage [V]:	6/12/24
Test range [A]:	40 - 2000 SAE, 40 - 1885 EN, 30 -1320 IEC, 25 -1120 DIN
Languages:	English, German, France, Spanish, Italian, Portuguese, Russian, Czech
Dimension [cm]:	approx. 25 x 13 x 4,5
Weight [kg]:	approx. 0,5 kg
Cable length [cm]:	approx. 180 (detachable)

ITEM NUMBER

1210000291
